

The supreme solution

Low profile

Ensures good penetration, which brings lower fuel consumption and less stress on the machine.

Teeth with self-sharpening design and large amount of wear material

Extended operation time which leads to lower production cost.

Precise fit with large contact surfaces

Extended life time, more teeth per adapter, which leads to lower maintenance cost.

Strong and reliable wear cap adapter

Extended operation time, which leads to lower maintenance cost.

Reusable and strong locking pin

Reduced cost for locks and reliable locking function.

Locking ring integrated in the tooth

User friendly, strong and reliable locking function.

A good choice for the environment

All of our products are produced in Sweden from local recycled scrap and exclusively with electricity from wind- and water-power produced in Sweden.

Mechanical lock

User friendly and reliable locking function, safe and quick tooth replacement.
